

Danish Billion-Trade Is Direct Funding of the Terror-States' Continuing Occupation of Palestine

News:

Altinget.dk recently revealed that when the Danish government earlier this year, signed a billion-kroner agreement with the Jewish weapons manufacturer, Elbit Systems, it was on a misleading basis by the Danish Minister of Defense, who presented lies to the parliament in order to get the agreement through. Elbit Systems are known for testing their equipment in Gaza and the West Bank, and they provide weapons to the brutal attacks of the Jewish army on innocent children and women in Palestine.

Comment:

While multiple parties now express outrage over the purchase process and the false deadline, and call on a study of the course, it is not up for discussion whether or not to actively support the Jewish terrorist state, neither in the right- or the left-wing block, nor across the middle. If anything, this case shows that political Denmark continues decades of support for the Jewish state's illegitimate occupation of Palestine, regardless of how inhuman its obvious crimes become. With one hand, the government donates defense systems to Ukraine to expel the Russians, while with the other hand, it signs a direct trade agreement in the billion size with the Jewish states' military industry, which delivers the machinery for mass killing and expulsion of Muslims in Palestine. This is the kind of hypocrisy that characterizes Christiansborg, where lies and manipulation are the rule rather than the exception, especially in cases relating to Muslims.

To reduce the case to a question of misleading information in the buying process while overlooking the even greater crime, in which all who approved the acquisition are accomplices, namely the support for the military occupation of Palestine, is another example of this hypocrisy. Similarly, the repeated lie from Christiansborg about the Jewish entity's right to protect itself, and the lie of its sovereignty and right to exist, are much greater than any lie about deadlines and purchase processes.

That which has no right to exist, cannot have any right to "protect itself". This case merely emphasizes the fact that the Danish state and government provide direct support for the continued military occupation of Palestine and the indescribable crimes against its population!
