Unfortunately, every new rising day we are witnessing a new pain. Every day we hear the news of another attack in one of our regions. This may sometimes be Istanbul, sometimes Kayseri, or Aleppo, Idlib or sometimes Arakan, Gaza or another. It seems that those authorities, who make condemning statements and harsh declarations at every opportunity do not take any lessons from experience, thus continue their relations with the real perpetrators. Mothers wail, lives get lost, treasures and hopes are demolished...

Since 2007, we witness that whenever the constitution change topic is brought up, it is immediately followed by a kind of despicable attack. After the AKP made some structural and personnel changes in state institutions and especially in the army following the July 15 coup attempt, it brought the constitution topic to the agenda with the support of MHP. After completing necessary work, the agreed draft between the AKP and MHP was presented to parliament on 10th of December, 2016. And the same night the attacks claimed by TAK occurred in Istanbul's Besiktas district. The English *Financial Times* analysed the attack as follows: *"The attack happened right after making public the constitution draft that would strengthen AKP's - Recep Tayyip Erdogan's – presidency, which would enable him to lead Turkey until 2029."* After the Kayseri bombing Minister of Domestic Affairs Suleyman Soylu stated: *"This is very obvious, after the 15th of July, those who were unsuccessful in 15th of July in invading Turkey hand in hand are today trying to discourage Turkey with terrorism and are trying to lead her to despair."*

The constitution and system change is the red line of the founders of Turkey and the English politics that supports them. This establishment has always tried to prevent American style politics from integrating into Turkey but for vain... As the presidency system, whatever the name should be, will affect the impact and interests of English politics upon Turkey, they will do anything in their power to prevent it.

This is the process of generating a public opinion and preparing the people in favour of the AKP through the support of MHP, with the aim at keeping the issue on the agenda and thus convincing the people until the referendum. These attacks however, change the topic and prevent the increase of support.

This kind of attacks by PKK and other terrorist organisations may stir some unrest in public. Even though AKP manages to turn the public opinion to its advantage after every attack, unrest will increase after every attack. If the referendum is done in April and if the attacks continue until that day, the situation will get severe.

No matter if the constitution change comes true or not, the English will continue these attacks in order to achieve reconciliation and compromise. They also aim at boosting the worsening of the country's economy and thus weakening the government.

Both the attacks on Istanbul and Kayseri, as well as Halep are planned from the same points. The goal is to put all Muslim countries into chaos and tumult. And those who do this are not the subcontractor organisations; but it is those Kuffar nations who are behind such organisations, namely the US, England, Russia and "the Jewish entity". That is why what is needs to be done is to stop all relations with these countries, close their embassies, kick out or imprison their agents and to return to Islam. It has never been and will never be possible to stop, prevent and to end terrorism, without fighting the true perpetrators. Therefore, in order to end terrorism, the colonialists have to leave. The struggle must be against the true perpetrators if we want to clean our soils and regions from terror. Otherwise we would only struggle against the flies without drying out the swamp, and this is not a fundamental solution. This however is only possible through the Khilafah Rashidah upon the method of the Prophethood and its implementation of Islam, the source of life.
