Press Release

The Liberation of Palestine Is Getting Closer

(Translated)

With the help of relatively simple means and light weapons, resistance fighters from the besieged Gaza have succeeded in shooting down the illusion of the alleged strength of the Zionist occupation. This action has not only exposed the fragility of the Zionist entity. It has exposed the treacherous regimes in the Muslim world that have justified normalization agreements on the grounds that the Zionists are too militarily superior to overcome.

Indeed, Operation Al-Aqsa Flood has proven that it would be a matter of hours, rather than days, before Palestine would be liberated if a regular army was deployed against the occupation.

The Danish government and the Danish media have once again exhibited their hypocrisy by calling the fight against the Zionist occupation "terror", while at the same time covering up the terror that the Zionists have subjected the Palestinian population to for over 75 years. Denmark has even supplied the terrorist entity's air force with weapon components, which it has used to murder men, women and children in the Gaza Strip.

The Zionist occupation will try to cover up its fragility by doing what it does best: bombing defenseless civilians in Gaza from the air. But the damage is done to them. It has become obvious to everyone - especially the Muslim soldiers in the military forces of the Muslim countries - that the Zionists are easy to overcome. The liberation of Palestine has therefore come closer these days.

Hizb ut Tahrir calls all Muslims to join the call for the Khilafah (Caliphate) State as the correct solution for the Muslims of the world, as well as the overthrow of the puppet regimes in the Muslim world, which are the true guardians of the Zionists. When this goal is realized, it will not take more than a few moments for Palestine to be liberated again. When this time comes, no one will be on the side of the Zionists, not even Denmark's terrorist-sympathizing government.
